

## Cycling & Non-cycling Dryers

### Champion CGD Series Dryers (Non-Cycling)

CGD series refrigerated air dryers offer the perfect balance between technology and simplicity to dry compressed air systems to a stable ISO 8573-1 Air Quality, Class 4 to 5 pressure dew point.

Models 10–150 SCFM

- Illuminated on/off switch
- Dew point temperature display to monitor inlet load conditions

Models 200–1200 SCFM

- Illuminated on/off switch
- LED dew point temperature display
- EDV control
- Dry alarm contact
- Equipped with panel mounted drain timer control

### Mattei MDS Series Dryers (Cycling)

Mattei MDS Series dry storage cycling dryers automatically start and stop the refrigeration compressor to maintain dew point keeping your air system free of water. The advanced Mattei MDS cycling refrigeration air dryer combines the advantages of a direct thermal exchange with advanced Dry Storage Technology. It's two dryers in one.

The Mattei MDS features a simple microprocessor based control and protection system which controls the dryer operation and adapts to the specific heat load demands.

The Mattei MDS features easy to use advanced controls that include digital dew point temperature display, menu driven programming and icons for drain and compressor operation.
